

# Play Clay Recipe

Play clay can be used over and over, it will never harden.

Gather these items:

2 cups sifted flour

1 cup salt

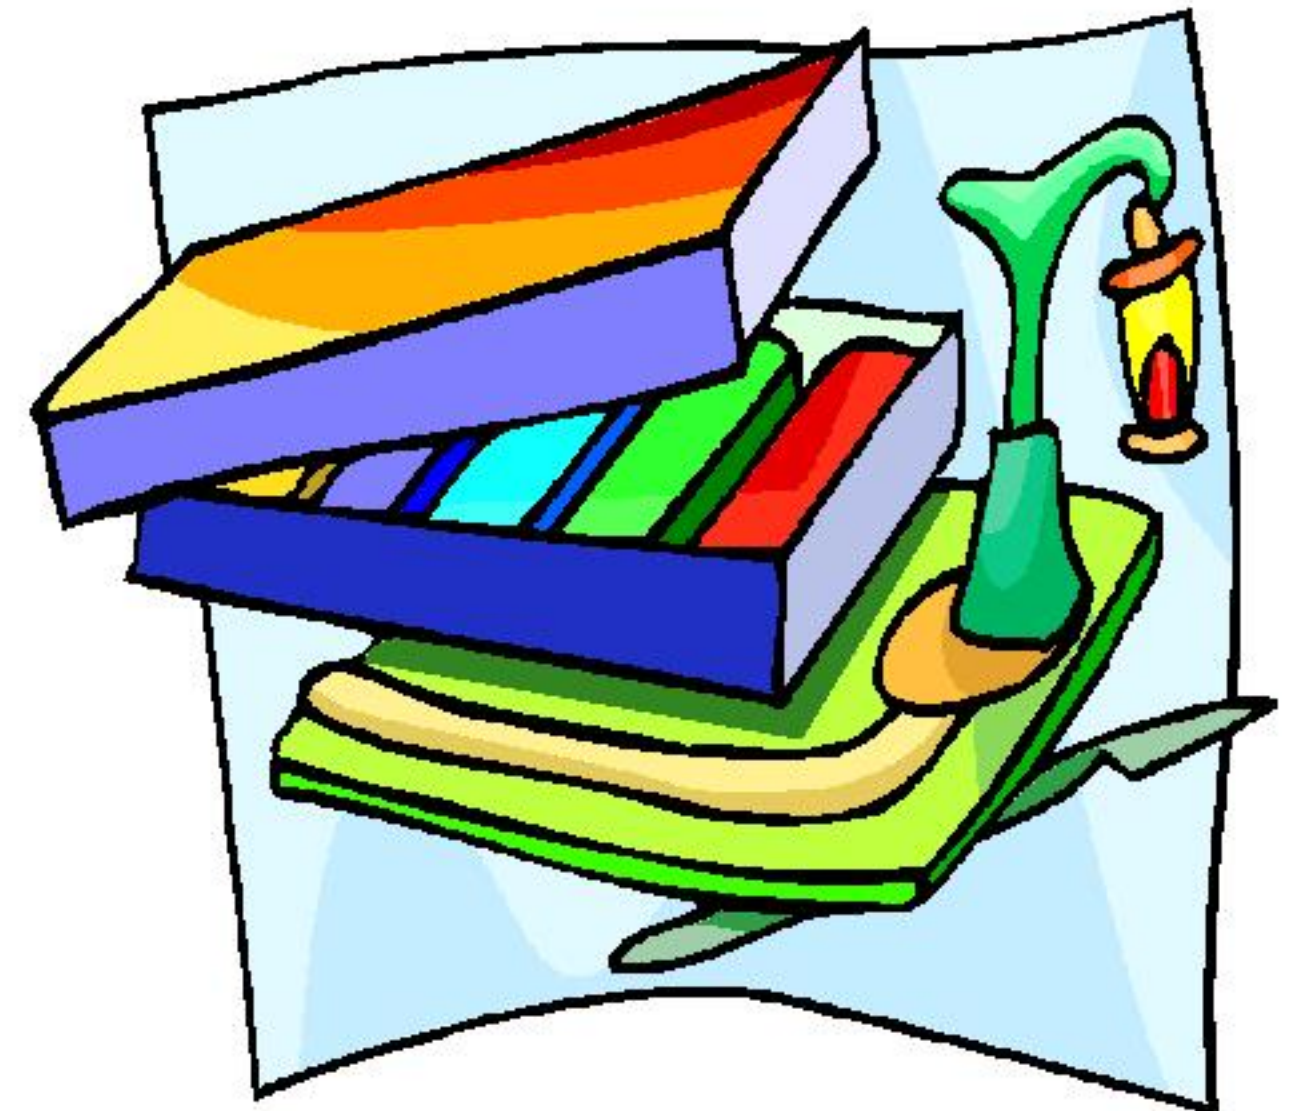

6 teaspoons alum (acts as a preservative)

2 tablespoons salad oil

1 cup of water

medium-sized mixing bowl and spoon

resealable plastic bags or containers

Let's get started...

1. Food coloring may be added to the water before mixing, if color is desired.
2. Mix all materials together in the bowl until they are smooth.
3. The play clay will stay soft for weeks if you keep it in a sealed plastic bag or container.
