

Christmas Wreath Fractions

Christmas Wreath Fractions

Instructions:

1. Print out Christmas Wreath on card stock paper or plain paper.
2. Cut out the wreath and its pieces.
3. Teach the children their fractions by allowing them to put the wreath together and then handing out pieces of the wreath for everyone. Ask them after each piece what fraction has been cut. For example, one piece cut = $\frac{1}{8}$ of wreath. What fraction of wreath is left? $\frac{7}{8}$ of the wreath is left.
