

Pumpkin Fractions

Pumpkin Fractions

Instructions:

1. Print out Pumpkin on card stock paper or plain paper.
2. Cut along the dotted line to make the Pumpkin pieces.
3. Teach the children their fractions by allowing them to put the pumpkin together and then handing out pieces of the pumpkin to everyone. Ask them after each piece what fraction has been cut. For example, one piece cut = $\frac{1}{8}$ of pumpkin. What fraction of pumpkin is left? $\frac{7}{8}$ of the pumpkin is left.
